## Education

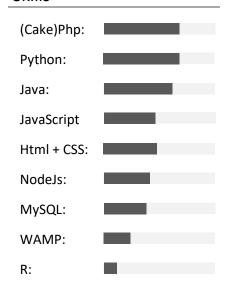

## Georgia Institute of Technology 3.67

Computer Science / Applied Mathematics 2014 - 2018

#### **Normal Community High School 5.23**

**High School Diploma** 2010 - 2014

# Skills

#### Certifications

#### Coursera

# Data Science Specialization (in R)

- **Regression Models**
- Statistical Interference
- Reproducible Research
- **Exploratory Data Analysis**
- **Getting and Cleaning Data**
- R Programming
- The Data Scientist's Toolbox

# Work Experience

## PegasusCRM | Spring 2017

#### Co-op / Backend Developer (Semester 1)

Fixed major problems in PDFHalo's (side product of Pegasus) core software including a whole redesign of the system architecture

# PegasusCRM | Spring 2017

# Co-op / Backend Developer (Semester 2)

Led team of interns to create a new merchant acquisition project. Finished project ahead of schedule and ahead of standards.

# Freelance | Summer 2016

## **Android Developer**

Developed and implemented a shopping app's database structuring. Also worked to create a basic cricket score-keeping app for a friend while mentoring an entry android developer through the entire process.

## State Farm | Summer 2015

#### Student Intern

Made changes to the whole design of the onboarding program, rerouting focus from boring links to interactive videos and more helpful resources.

#### Research

#### Android UI Development | Spring 2015

#### Student Researcher

Worked on finding and created a clean, well-functioning base level UI. Created a website to share this information with other beginner android developers.

#### Android UI Development | Fall 2015

#### Student Researcher

Worked to create an application that took existing application ideas and merged them into one single app. Focused on pinging school twitter database for tweets to display on social tab of app.

# Personal Projects

#### NLP Text Classification | In Dev

Trained a text classification model to categorize a phrase as positive or negative. Still working on applying this to the real world

## Personal Website | In Dev

Created a website from scratch using NodeJS. Will be the future home of my machine learning projects
